

Dom Fafora

International work

Design development and detailing of this Moscow based luxury gift & home-wares store.

The brief was to design, develop and detail the entire lighting scheme to suit the separate locations throughout. The 10,000 square foot "Asprey of Russia" store is well finished to present the household products at their best.

From in-house meetings and initial sketches through to manufacture and installation details for the LED features. We also introduced walkway lighting and sectional control to the separate areas

PROJECT MANAGEMENT

lighting design

- Full lighting design in CAD
- Lighting calculations
- Initial lighting concept pages
- Specification control
