

Foyles

Retail work

FOYLES

We gained the opportunity to provide a complete lighting package for the prestigious Foyles bookseller. The project included detailed retail lighting and bespoke shelving LED, office and amenity lighting.

The store had a large double height entrance which required very high power LED light engines to ensure products in the front of the store were well illuminated. Each area required different illumination levels, from the bright and colourful kids section to the focused crime and fiction department.

Our emphasis was to ensure the overall scheme was to be inviting yet efficient.

PROJECT MANAGEMENT

- Full lighting design in CAD
- Lighting calculations
- Specification booklets
- Co-ordination with contractors
- Mid-contract progress meetings
- Pre-opening commissioning of lighting
