

# High Wycombe Library

Landmark Buildings - Public work

Working with a selection of nominated architects over a 14 month period our lighting designs were developed and approved by the team. Our design concepts were taken through a rigorous inspection through to completion, whilst ensuring CIBSE levels were achieved.

Several ceiling feature details were within our solution - from stretched ceilings to random surface linear placements. These details helped to provide an interest, whilst maintaining the illumination throughout each space.

## PROJECT MANAGEMENT

lighting design

- Full lighting design in CAD
- Lighting calculations
- Specification booklets
- Stock control
- Co-ordination with contractors
- Specific delivery arrangements
- Pre-commissioning of lighting
