

Itsu

Restaurant work

The brief was to design and develop the entire lighting scheme to suit the different locations throughout their portfolio and for forthcoming developments. These sites were controlled to increase the throughput of clients during the busy periods, whilst ensuring a softer solution for the evening trade.

Working from initial plans we provided illumination calculations and settings throughout the day on a programmed dimming solution. We have taken the regular store maintenance from 2,000hrs up to 40,000hrs with an average of 60% reduction in energy.

lighting design

PROJECT MANAGEMENT

- Full lighting design in CAD
- Lighting calculations
- Specification booklets
- Energy calculations
- Specification control and samples
- Co-ordination with contractors
- Mid-contract progress meetings
- Pre-opening commissioning of lighting
- Control system programming
