

Nicholas Kirkwood

Retail work

**NICHOLAS
KIRKWOOD**

This Mayfair based shoe designers flagship store was due to be refurbished. The interior designer contacted us upon a recommendation. We were asked to produce a lighting layout that utilised as many existing light fitting locations as possible to save on ceiling repairs. The whole site is illuminated with LED engines with 3,000k colour temperature and high colour rendering. Several areas also included hidden LED tape and LED filter correction filters to achieve the desired look and feel for the products on display.

PROJECT MANAGEMENT

lighting design

- Full lighting design in CAD
- Lighting calculations
- Specification booklet
- Co-ordination with contractors
- Pre-opening commissioning of lighting
